

## WEEKLY WATER LEVEL BULLETIN

This weekly bulletin serves to share the behaviors of our river within a week; below plot is Akanyaru River at Akanyaru-upper hydrological station.

Water levels: Min: 0.92m; Mean: 1.07m; Max: 1.33m

Difference from previous week: Min: -0.18m; Mean: -0.42; Max: -0.88m

### **Data from previous 7 Days**

From Friday last week, water level has been decreasing till to Wednesday this week, but Thursday it has suddenly increased i.e. there may be an intense rainfall in Akanyaru catchment, especially in upstream sub catchments.

### About this plot

1. The river height data is the latest available operational data provided for water monitoring purposes
2. This data is provided from automatic equipment.
3. All river height reports are in meters and are shown in local time.
