

Units: m
Identifier: Stage.Telemetry1@281001
Location: Nemba

The graph illustrates the dispersion of light in water, showing that the index of refraction is higher for shorter wavelengths (violet light) and lower for longer wavelengths (red light). The data points are connected by a smooth curve, and a grid is provided for reference.

Wavelength (nm)	Index of Refraction
400	1.330
420	1.328
440	1.326
460	1.324
480	1.322
500	1.320
520	1.318
540	1.316
560	1.315
580	1.314
600	1.313
620	1.312
640	1.311
660	1.310
680	1.309
700	1.308
