NETHERLANDS WATER PARTNERSHIP: MORE IMPACT ABROAD

IWRM Conference 20 & 21 March 2019
Kigali, Rwanda

BY ANNEMARIE MASTENBROEK

**THROUGH COLLABORATION WE
ACHIEVE MORE IMPACT ABROAD**

Introduction

Water and The Netherlands

Introduction

(continued)

- The Netherlands is a low lying country, yet it is one of the safest deltas in the world
- Shaped by three main rivers flowing from Europe into the sea and bordering partly to the North Sea, for ages water has been our friend and foe
- Our adaptive nature and the necessity to cooperate has ensured a safe living space with clean drinking water for 17 million people in a country that only measures 41,526 km

Introduction

(continued)

Some facts & figures

- One-third of the Netherlands lies below sea level, including our economic centre
- Lowest point in the Netherlands lies at 6.76 meters below sea level
- The Dutch coastline is 451 kilometers long
- The Dutch Delta Works encompasses 16,500 kilometers of dikes
- The Netherlands has 6000 kilometers of rivers and canals
- The Dutch water system has less than 5% leakage
- 99% of Dutch houses are connected to the sewer system

WHY NWP ?

Why is there a Dutch water partnership?

- The Netherlands and water are synonymous, we therefore join forces for sustainable water solutions at home and abroad!
- Belief in a strong collaborative alliance to find balanced solutions for too much, too little and too dirty water.
- During 1st World Water Forum in Morocco in 1997, the Dutch water sector and Netherlands government saw need for greater collaboration → this led to establishment of NWP in 1999.

Branding the integrated (holistic) approach

Water challenges almost never stand alone. Solutions require a broad perspective, involvement of stakeholders, cross-sectoral cooperation and innovative thinking.

Solutions for monitoring & sensing

Solutions for clean drinking water

Solutions for a safe water environment

Solutions for peace & stability

Solutions for agrifood

Solutions for resilient cities

HOW DO WE DO THAT?

NETWORK

VISIBILITY

**KNOWLEDGE AND
INFORMATION**

INFLUENCE

Bringing together stakeholders via high-level meetings, round table sessions and networking events

Branding & exposure
of Dutch expertise at
conference exhibitions

Exchanging knowledge for mutual learning,
export promotion and business cooperation

Contributing to international policymaking/water agenda

What is NWP?

Who are we?

- Network of Dutch organisations in the water sector with international ambitions.
- Based in The Hague and founded in 1999 as a foundation
- Uniting Dutch Water Excellence

- Water & Crisis

What does NWP do and how?

(continued)

Three Ministries, Netherlands Enterprise Agency and NWP working on programmes

Outcomes in practice

(Examples)

NWP's activities contributing to partnerships

Outcomes in practice

(Examples - continued)

NWP boosting finance for water

- KIFFWA: implemented by NWP with support from the Dutch Embassy in Nairobi
- Providing early-stage capital, finance and technical expertise to support viable water investment opportunities
- Creating opportunities for both Kenyan and Dutch water sector
- Goal: to help develop sustainable water projects develop, and to attract private finance for the water sector

How is NWP financed?

Budget in 2017 based on type of income

- Total income: EUR 10.979.277

- Typ/origin of income in percentages:

- ✓ **External projects:** 10,6%
- ✓ **Programmes funded by decentral government:** 18,7%
(Embassies)
- ✓ **Programmes funded by central government I:** 33,1%
(1 ministry: Foreign Affairs):
- ✓ **Programmes funded by central government II:** 34,3%
(3 ministries: Infrastructure & Water Management,
Foreign Affairs, Economic Affairs & Climate Policy)
- ✓ **Member contributions:** 3,3%
 - ➡ *EUR 1500 per year for organisations < 51 people*
 - ➡ *EUR 3000 per year for organisations > 50 people*

Challenges & Opportunities

Challenges

- Need for income diversification, adjusted business model
- Find good balance between promoting Dutch water sector and addressing needs/demand in countries where Dutch sector is active

Opportunities

- Identify linkages with other sectors and extend partnerships
- International positioning of Dutch sector expertise in terms of impact created

Let's work together!

Where to find Dutch water expertise?

- Visit the web portal www.dutchwatersector.com
- International events
- Amsterdam International Water Week

And of course, you can contact the Netherlands Water Partnership anytime for all your questions on Dutch Water Excellence!
